Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 February 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: On page 6, line 33, "silica, aluminum or a mixture of these two species" is mentioned. The examiner believes that silica, alumina or the mixture of these two species is meant.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. The claim contains improper Markush language. Proper Markush language is "selected from the group consisting of".

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3, 5, 6, 8, 11-13, 15-18, 20, 21 and 24-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Brown et al. 6,172,154 or Brown et al. 6,291,572.

7. Brown et al. ('154) disclose unsaturated elastomer, filler and pre-vulcanization modifier in claim 1, tertiary butylphenol polysulfide in claim 4, its concentration in claim 5, Si 69 and its concentration in claim 13, elastomers and process temperatures in claim 14, tire tread in claim 26 and filler concentrations and silica in column 7, lines 48-57. Brown et al. ('572) teach silica in claim 11 and column 9, line 63, unsaturated elastomer, filler and pre-vulcanization modifier in claim 17, polysulfidic alkylphenol in claim 21, tertiary butylphenol polysulfide in claim 22, its concentration in claim 24, Si 69 and its concentration in claim 34, elastomers in claim 35, filler concentrations and tire tread in column 19, lines 53-55 and process temperatures in column 8, lines 22-30. Applicant's claims are not novel.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 1-13 and 15-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown et al. 6,172,154 or Brown et al. 6,291,572.
10. Both references have been described already. It would have been obvious to one having ordinary skill in the art, at the time the invention was made, to select silica from a list of equivalents.
11. Any inquiry concerning this communication or earlier communications from the
